

NAME

`mda-dump` – dumps entire contents of MDA files to standard output

SYNOPSIS

`mda-dump` [**`-hv`**] *file*

DESCRIPTION

`mda-dump` is a utility for dumping the entire contents of binary MDA data files, which are created by **`saveData`** in **EPICS**. The output format is odd, but it follows exactly the format of the file itself. Unless one of the options is used, **`mda-dump`** needs only *file*, the name of the MDA file.

This program is useful for debugging other programs that interact with MDA files.

OPTIONS

- `-h`** Show the help screen.
- `-v`** Show the version information.
