NAME

mda-dump – dumps entire contents of MDA files to standard output

SYNOPSIS

mda-dump [−**hv**] *file*

DESCRIPTION

mda-dump is a utility for dumping the entire contents of binary MDA data files, which are created by **saveData** in **EPICS**. The output format is odd, but it follows exactly the format of the file itself. Unless one of the options is used, **mda-dump** needs only *file*, the name of the MDA file.

This program is useful for debugging other programs that interact with MDA files.

OPTIONS

−**h**   Show the help screen.

−**v**   Show the version information.
