

USING THE MOTIF BROWSER

Pulldown File / Connect

Pulldown Options / Update

Pulldown Options / Query

Query Dialog Box lets you set from/to Time with buttons.

**Query search syntax is similar to C logic expressions.
For example Facility == 'EPICS' && Severity > 10.**

**All strings must be in a single quote ('EPICS').
You can also do a simple pattern match like:
Message like 'error happened'.**

A complicated query will slowdown the server.
